Artist Statement

My artwork has come from memories of summers spent leaping and diving, doing cannonballs and back flips, participating in breath holding contests and looking up through chlorine filtered sunlight daydreaming. In water, we become weightless, buoyant and free both in mind and body. As a competitive swimmer and Psychologist for most of my life, these are elements I consciously integrate into my work. Using found objects, paint and photographs, I create nostalgic paintings of the past I carry with me into the present.
